

## LY — 03 Specification for small solenoid locks

### 一、产品简介

This lock is a small solenoid valve lock made of stainless iron material frame, the shell is chrome-plated and rust-proof, and the inside is made of pure copper coil, which has stable performance, more temperature resistance, low power consumption, more beautiful, durable and economical. This lock can be widely used in filing cabinets, shopping cabinets, lockers, etc.

### 二、technical parameters

Lock body size: 55mmX40mmX28mm  
Security type: Power-on, unlock, power-off, and locking  
wiring instructions: Regardless of positive and negative ambient temperature, a 30°C, 55°C  
deadbolt suction: 1N (0.1KG)

Voltage:

DC12V/DC2

4V Optional

current:

0.8A/1.2A

Deadbolt

stroke:

10mm

Relative

humidity: 10%-95%

Instructions for use Solenoid valve locks are not suitable for long-term power-on and over-frequent switching
