

## Raspberry *Pi* Matrix

### **Description:**

Using Dot Matrix LED screen Raspberry pi, would be more troublesome .Due to the limited number of raspberry pi IO, IO control if each LED will take up only about 35 LEDs.

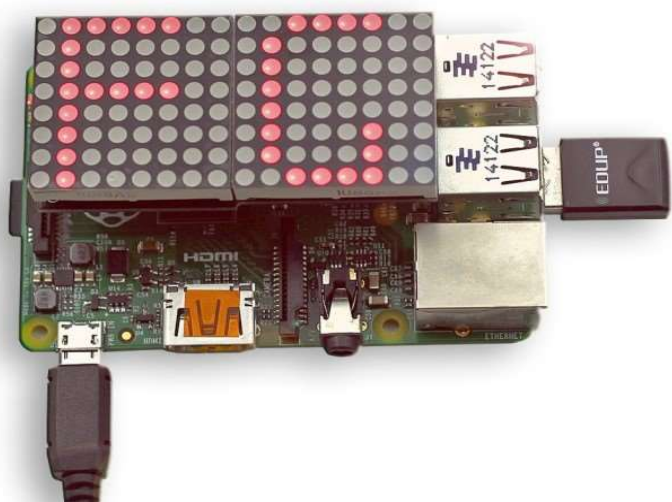

Using special LED constant current control chip SPI interface essentially hold only a Raspberry Pi (3 + 2 Enable IO) can control 64 LED lights .Dot Matrix LED Drive becomes possible !

### **Features :**

- Support Raspberry Pi B/B+
- Driver chip : MAX7219
- Dot matrix type: 8x8 common cathode red dot matrix
- Module size:64.3x35.0x29mm

### **Package Included:**

1 X LED Matrix for Raspberry Pi

*Made in China*
